

iGuide Robotics, Inc.
11711 N. College, Suite 160
Carmel, Indiana 46032

To whom it may concern:

Our business is based on supplying GPS coordinates to mowers at 50 times a second. Approval of the light squared application will cause interruption in our supplying these coordinates and could be dangerous and cause injury to many persons and eventually erode our business causing huge losses for our young start up company and the loss of many hundreds of employees.

We understand Light Squared is making large political contributions to make this happen, but we are hoping that the FCC is above that political influence.

Thank You,

Sincerely,

Thomas A. McCalley, President
iGuide Robotics, Inc.
